

**REMARKS**

The application is in condition for allowance except for the objection over drawings. The drawings  
5 are objected to under 37 CFR 1.83(a).

**1. Objection over the drawings:**

To overcome this, an oxide layer, which is described  
10 in paragraph [0013], line 7 of the specification, is  
now added and denoted by reference number "57" in the  
amended Figs.4-9. A plurality of sources and drains,  
which are described in paragraph [0014], line 10, are  
now added and denoted by reference number "71" in the  
15 amended Figs.5-9. A glue layer, which is described in  
paragraph [0017], line 1, are now added and denoted  
by reference number "81" in the amended Figs.8-9.  
Because of the addition of numerals 57, 71, and 81 in  
Figs.4-9, the contexts in paragraphs [0013], [0014],  
20 and [0017] of the specification are accordingly  
amended as set forth in the above AMENDMENT TO THE  
SPECIFICATION section. No new matter is introduced.  
Allowance of the drawing corrections is politely  
requested.
